notes...

- **Windows** must be safely accessible with a step-ladder, without the removal of bars. Weather conditions may later affect the appearance of the windows, following our clean.
- Internal oven clean while Smudge Budge will endeavour to remove as much burnt-on carbon as possible, not all burnt-on carbon can be removed. This is generally the case if an oven has not been cleaned on a regular basis and is in a sub-standard condition. Smudge Budge will de-grease all ovens during the cleaning process using standard de-greasers.
- **Mould** any mould deeply imbedded into silicon, grout and other areas will require a specialist to restore back to a normal state.
- **Benchtops** we do our best to remove stains, however due to composition of the tiles or benchtops (some being extremely porous), it is not possible to remove stains without specialist intervention.
